TSX-V:LMR

Technical Report Filed On Lomiko's 100% Owned Vines Lake Property

Vancouver, BC - Lomiko Metals Inc. (TSX-V: LMR) ("Lomiko" or the "Company") announces it has completed an NI 43-101 Technical Report completed by Garth Kirkham, P.Geo. The report provides an independent geophysical and geological evaluation, an updated review of recent work (2008) conducted on the property, and details recommendations to further investigate the potential for the property to host an economic mineral resource.

Lomiko Metals Inc. holds the rights to three contiguous mineral tenures, totaling 1,169 Ha, (2,888 Acres) located in the south western corner of the Cassiar Gold District or 'Cassiar Gold Camp'. The Vines Lake property's northern boundary crosses Hwy 37N seven kilometers south of the unincorporated settlement of Jade City. Highway 37 N bisects the property north to south. The property is located approximately ten kilometres southeast of the town of Cassiar, B.C., Canada. The claims cover rocks of the Sylvester group, which are known to contain productive zones of gold mineralization in the area. The claim group is located approximately two kilometres southwest of the former Erickson gold mine.

The results of this evaluation reveal that potential exists on the 100% owned Vines Lake property for discovering new high-grade gold vein systems, and other intrusion related mineralization simply due to the proximity to the proven mining history in the Sylvester Allocthon, and the presence of the Cassiar Batholith and its contact with the autochthonous Cassiar Terrane rocks, over which Lomiko's Vines Lake property claims are located.

An exploration program is recommended for the property by the author. This program is targeted at both high-grade gold vein systems and intrusion related mineralization. Phase I consists of geological mapping, geochemical sampling and ground geophysical surveying which and should begin as soon as weather and snow conditions permit. Contingent on Phase I result, Phase II will explore follow-up targets resulting from Phase I exploration activities. A total budget for the exploration program is estimated at \$971,500, which is outlined as \$391,500 for Phase I and approximately \$580,000 for Phase II.

Mr. Garth Kirkham has not specifically visited the property himself due to deep snow cover and the fact that the property is in the early stages of exploration. Mr. Kirkham will plan a visit in the near future. This visit is planned once the snow cover has diminished to a level that would make a site visit meaningful. However, Mr. Kirkham has visited the adjacent property, recently acquired by Hawthorne Gold Corp., several times in 2005 through 2006 as a director and Qualified Person for the former owners, Cusac Gold Mines Ltd., and remains the Qualified Person for Table Mountain for Hawthorne Gold Corp. Mr. Kirkham is the author of the most recent "Update of Technical Report" on

the adjacent Table Mountain property and is therefore familiar with the property's exploration potential, and the overall physical status of the property with regards to road access, reclamation, and state of local infrastructure facilities in addition to resources potential on the property. Mr. Garth Kirkham, P.Geo, is the Qualified Person for the Vines Lake Property, has read and approved the contents of this press release and is responsible for the technical content of this news release.

The Company has filed the report on SEDAR for viewing at HYPERLINK "<http://www.sedar.com>" www.sedar.com.
