

PRESS RELEASE

November 18, 2015

LOMIKO METALS INC. AND CANADA STRATEGIC METALS INC. INTERSECT 112 METRES OF 2.73% AND 103.35 M OF 2.83% FLAKE GRAPHITE AT LA LOUTRE

November 18, 2015 - Lomiko Metals Inc. (TSX-V: LMR, OTC: LMRMF, FSE: DH8B) and Canada Strategic Metals Inc. ("Canada Strategic Metals") (TSX.V: CJC; FSE: YXEN; OTC-BB: CJCFF) are very pleased to announce continued near surface, high grade flake graphite results.

"After seeing these results and watching the Canadians storm back to score 4 unanswered goals to win against the Canucks last Monday, I am considering moving to Quebec," stated A. Paul Gill, CEO of Lomiko Metals Inc.

The La Loutre property consists of contiguous claim blocks totalling approximately 2,867.29 hectares (28,67 km²) situated approximately 53 km east of Imerys Carbon and Graphite, formerly known as the Timcal Graphite Mine, North America's only operating graphite mine, and 117 km northwest of Montreal.

Table of Mineralized intersections*

Hole #	From (m)	To (m)	Length* (m)	Gp %

* Length along the core. The true width of the drill hole represents between 80% and 95% along the core.

The 2015 drilling program is managed by Consul-Teck Exploration of Val-d'Or, Quebec, who designed the drilling campaign, supervised the program and logged and sampled the core.

Consul-Teck Exploration implemented QA/QC procedures to ensure best practices in sampling and analysis of the core samples. The drill core was logged and then split, with one half sent for assay and the other retained in the core box as a witness sample. Duplicates and blanks were inserted regularly into the sample stream.

The samples in secure tagged bags were delivered directly to the analytical facility for analysis. In this case, the analytical facility was the ALS minerals in Val-d'Or, Quebec. The samples are weighed and identified prior to sample preparation. The samples are crushed to 70% minus 2 mm, then separated and pulverized to 85% passing 75µm. All samples are analyzed for Carbon Graphite using C-IR18.

Jean-Sebastien Lavallée (OGQ #773), Geologist, is a shareholder of both companies, President and Chief Executive Officer of t Canada Strategic and a Qualified Person under NI 43-101, has reviewed and approved the technical content of this release.

About Lomiko Metals Inc.

Lomiko Metals Inc. is a Canada-based, exploration-stage company. Lomiko Metals Inc. is engaged in the acquisition, exploration and development of resource properties that contain minerals for the new green economy.
