

LOMIKO COMPLETES 15 HOLES AND ADDS SIX NEW DRILL HOLE LOCATIONS TO COVER EXPANDING FLAKE GRAPHITE ZONE FOR THE UPGRADE OF THE LA LOUTRE RESOURCE BEFORE PRE-ECONOMIC ASSESSMENT

(Vancouver, B.C and Montreal, Que) March 7, 2019 Lomiko Metals Inc. ("Lomiko") (TSX-V: LMR, LMRMF, FSE: DH8C, (ISIN: CA54163Q1028) (WKN: A0Q9W7) (LEI: 529900GJP51V4HR9MN94) and Quebec Precious Metals (TSXV: CJC, FSE: YXEN, OTC-BB: CJCFF) are very pleased to announce an expansion of the 15 drill hole program to 21 drill holes at the Refractory Zone of the La Loutre graphite property (the "Property").

On <u>March 24, 2016</u>, a technical report prepared in compliance with NI 43-101 on standards of disclosure for mineral projects, was filed for the Property. The report presented a mineral resource estimate of 18.4 M Tonnes of 3.19% carbon flake graphite ("Cg") in the Indicated category and 16.7 M Tonnes at 3.75% Cg in the Inferred category using a cut-off of 1.5%.

The mineral resource **does not** include high grade intercepts of **7.74%** Cg over **135.60** metres including **16.81%** Cgr over **44.10** metres from hole LL-16-01, two different intersections in hole LL-16-02 reporting **17.08%** Cg over **22.30** metres and **14.80%** Cg over **15.10** metres, and **110.80** metres of **14.56%** Cg in hole LL-16-03, nor the 28.5 metres of 16.53% Cg and 21.5 metres of 11.53% Cg reported on January 6, 2016 and 9,0% over 90.75 metres reported on September 24th 2015 from the Refractory Zone.

The area of mineralization appears to be 200 metres wide, has a current strike length of approximately 400 metres in the northwest to southeast direction and is open in both directions.

The table below shows the drilling results from holes LL-16-001 to LL-16-010. A drill hole location map can be found under the heading Quicklinks: <u>Drill Map</u> which includes 2015 and 2016 results and highlights.

Table of 2016 drill results LL-16-001 to LL-16-010 from Refractory Zone:

Hole #	From (m)	To (m)	Length* (m)	Gp %
LL-16-001	3.90	139.50	135.60	7.74
includes	3.90	48.00	44.10	16.81
includes	135.00	138.00	3.00	14.85
LL-16-002	3.90	26.20	22.30	17.08
includes	113.9	129.00	15.10	14.80
LL-16-003	30.20	141.00	110.80	14.56
LL-16-004	NSV			
LL-16-005	55.80	57.40	1.60	13.35
LL-16-06	54.00	141.00	85.00	7.67
includes	109.50	141.00	31.50	13.09
LL-16-007	52.50	115.80	63.30	8.51
includes	69.00	85.50	16.50	15.75
LL-16-008	109.50	121.50	12.00	3.91
LL-16-009	NSV			
LL-16-010	31.20	45.00	13.80	4.14
	72.00	147.00	75.00	4.60

* Length along the core. According to the Society, the true width of the drillhole represents between 80 % and 95 % along the core.

"The current drilling program is providing an opportunity to expand the size of the Refractory Zone to find the best opportunity to define our proposal for a low footprint, open pit operation", stated A. Paul Gill, CEO of Lomiko Metals Inc.

The Property consists of contiguous claim blocks totalling approximately 2,867.29 hectares (28,67 km²) situated approximately 53 km east of Imerys Carbon and Graphite, formerly known as the Timcal Graphite Mine, North America's only operating graphite mine, and located 117 km northwest of Montreal.

Jean-Sebastien Lavallée (OGQ #773), Geologist, is a shareholder of both companies, VP Exploration of Quebec Precious Metals and a Qualified Person under NI 43-101, has reviewed and approved the technical content of this release.
