What is the Global Legal Entity Identifier (LEI)?

The Legal Entity Identifier (LEI) is an internationally standardized and globally valid identifier for participants in the financial market and serves to unambiguously identify business partners (eg companies, banks or investment funds) and to fulfill certain reporting obligations to supervisory authorities. What's new in comparison to existing systems is the global solution across all countries, markets and legal systems. The global adoption of a unified legal entity identification system is expected to reduce costs for businesses, as well as the financial market as a whole, improve risk management and promote transparency in the financial markets.
