**LOMIKO COMPLETES DRILLING TO EXPAND LA LOUTRE HIGH-GRADE REFRACTORY ZONE
AND REPORTS WIDE INTERCEPTS OF GRAPHITE IN MULTIPLE DRILLHOLES**

(Vancouver, B.C and Montreal, Que) March 19, 2019 Lomiko Metals Inc. (“Lomiko”) (TSX-V: LMR, LMRMF, FSE: DH8C, (ISIN: CA54163Q1028) (WKN: A0Q9W7) (LEI: 529900GJP51V4HR9MN94) and Quebec Precious Metals Corporation (TSX-V: CJC, FSE: YXEN, OTC-BB: CJCF) are pleased to announce the completion of a 21-hole diamond drilling program on the Refractory Zone of the La Loutre graphite property (the “Property”).

“Our exploration team reports graphitic zones in multiple drill holes.”, stated A. Paul Gill, CEO of Lomiko Metals Inc. “It is very encouraging to visually observe intercepts of graphitic material. We look forward to receiving assays in three weeks and then advancing the high-grade Refractory Zone to resource estimation stage.”

The focus of the program was to expand a discovery announced [March 7, 2017, and reviewed March 7, 2019](#) containing high grade intercepts of **7.74% Cg** over **135.60** metres including **16.81% Cgr** over **44.10** metres from hole LL-16-001, two different intersections in hole LL-16-002 reporting **17.08% Cg** over **22.30** metres and **14.80% Cg** over **15.10** metres, and **110.80** metres of **14.56% Cg** in hole LL-16-003, and the **28.5** metres of **16.53% Cg** and **21.5** metres of **11.53% Cg** reported on January 6, 2016 and 9,0% over 90.75 metres reported on September 24th 2015 from the Refractory Zone.

The area of mineralization appears to be 200 metres wide and now has a current strike length of approximately 900 metres in the west-southwest to east-northeast direction and is open in both directions.

The table below shows the drilling results from LL-16-001 to LL-16-010. A drill hole location map can be found under the heading Quicklinks: [Drill Map](#) which includes 2015 and 2016 results and highlights.

Table of 2016 drill results - LL-16-001 to LL-16-010 from Refractory Zone:

Hole #	From (m)	To (m)	Length* (m)	Cg %**
LL-16-001	3.90	139.50	135.60	7.74
Incl.	3.90	48.00	44.10	16.81
Incl.	135.00	138.00	3.00	14.85
LL-16-002	3.90	26.20	22.30	17.08
Incl.	113.9	129.00	15.10	14.80
LL-16-003	30.20	141.00	110.80	14.56
LL-16-004	No significant values			
LL-16-005	55.80	57.40	1.60	13.35
LL-16-06	54.00	141.00	85.00	7.67
Incl.	109.50	141.00	31.50	13.09
LL-16-007	52.50	115.80	63.30	8.51
Incl.	69.00	85.50	16.50	15.75
LL-16-008	109.50	121.50	12.00	3.91
LL-16-009	No significant values			
LL-16-010	31.20	45.00	13.80	4.14
	72.00	147.00	75.00	4.60

- * True widths of the graphitic material are estimated to range from 80% to 95% of the down-hole length along the drill core.
- ** These results have been previously disclosed

The Property consists of contiguous claim blocks totalling approximately 28.67 km² situated approximately 53 km east of Imerys' Carbon and Graphite operation, formerly known as the Timcal Graphite Mine, North America's only operating graphite mine, and located 117 km northwest of Montreal.

Jean-Sebastien Lavallée (OGQ #773), Geologist, is a shareholder of both companies, VP Exploration of Quebec Precious Metals and a Qualified Person under NI 43-101, has reviewed and approved the technical content of this release.
