**Off Balance Sheet Arrangements**

The Company is not a party to any off balance sheet arrangements or transactions.

**Related Party Transactions**

During the twelve-month period ended July 31<sup>st</sup>, 2009, the Company paid management fees to the following directors - \$57,500 to Ken Morgan, President and CEO; \$60,000 to A. Paul Gill, CFO and \$30,000 to Jacqueline Michael, Director. All of the above fees were in the normal course of operations and measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

**Outlook**

Management is currently focused on acquiring 100% interest in mineral assets rather than optioning properties from other parties. To that end, the Company decided to terminate its property option agreements with Copper Ridge Explorations and with Imperial Metals with regards to the BIG NAK properties in British Columbia as the cost of maintaining current status on these agreements was becoming too expensive. In June, 2009, the company began to focus specifically on lithium and rare earth metals properties. With the growing demand for high-tech electronics such as cell phones and laptops world-wide, especially the emergence of a consumer market in India and China, the high adaptation rate among the younger population in these countries and the increasing penetration of these products and the emerging hybrid and electric cars, the demand for lithium and other rare earth metals will also continue to expand.

Lomiko will focus on acquiring prospective lithium properties for exploration and development in order to launch the company's planned two-year exponential grow phase. If the assets acquired during this time are proven to be of merit, the company will continue with development of the assets or otherwise seek to maximize shareholder return on investment.

In addition, Lomiko explores for gold, as it is the opinion of management that gold and companies with gold discoveries, will be in significant demand as a hedge against currency devaluation in the face of the significant potential for lower interest rates in the face of global credit contraction.

The Company is continually involved in the ongoing process of identification and evaluation of new properties that can achieve the corporate objectives for near to long term growth. The Company plans to make additional acquisitions, if suitable properties become available to the Company, together with further financings in the future.

On behalf of the Board,

"Paul Gill"
