NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

Nine months ended April 30, 2019

Unaudited – Expressed in Canadian dollars

1. NATURE OF OPERATIONS AND GOING CONCERN

Nature of operations

Lomiko Metals Inc., (along with its subsidiaries collectively referred to as the “Company”), is engaged in the acquisition, exploration and development of resource properties and the investment in power supply products companies. The Company is considered to be in the exploration and evaluation stage. The Company was incorporated on July 3, 1987, under the British Columbia Company Act. The Company is listed on the TSX-Venture Exchange (“TSX-V”) having the symbol LMR.V as a Tier 2 mining issuer and on the Over the Counter Exchange in the United States having the symbol LMRMF.

The Company’s registered office is unit 439-7184 120th Street, Surrey, British Columbia, Canada.

Going Concern

These condensed consolidated interim financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future. The Company has incurred cumulative losses of \$25,782,957 and has reported a net loss of \$1,509,781 for the period ended April 30, 2019. The ability of the Company to continue as a going concern is dependent upon successfully obtaining additional financing, entering into a joint venture, a merger or other business combination transaction involving a third party, sale of all or a portion of the Company’s assets, the outright sale of the Company, the successful development of the Company’s mineral property interests, or a combination thereof. There can be no assurance that funding from this will be sufficient in the future to continue and develop its mineral properties. These factors indicate the existence of a material uncertainty that may cast significant doubt upon the Company’s ability to continue as a going concern. These condensed consolidated interim financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. BASIS OF PREPARATION AND STATEMENT OF COMPLIANCE

(a) Statement of Compliance

These condensed consolidated interim financial statements of the Company, have been prepared in accordance with International Accounting Standards (“IAS”) 34, “Interim Financial Reporting” using accounting policies consistent with IFRS as issued by the International Accounting Standards Board (“IASB”) and interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”). These condensed consolidated interim financial statements have been prepared following the same accounting policies and methods of computation as the audited financial statements for the fiscal year ended July 31, 2018. These consolidated financial statements were approved and authorized for issue by the Board of Directors on June 18, 2019.

(b) Basis of Presentation and Consolidation

These consolidated financial statements of the Company incorporate the financial statements of the Company and its wholly owned subsidiaries, The Conac Company Inc., Conac Software (USA) Inc., Lomiko Metals LLC and Lomiko Technologies Inc. from the day the Company gains control over the subsidiaries and ceases when the Company loses control of the subsidiaries. Control is achieved when the Company has power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect the investee’s returns.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

All significant intercompany transactions, balances, income and expenses are eliminated on consolidation.

These condensed consolidated interim financial statements have been prepared on the historical cost basis. In addition these condensed interim financial statements have been prepared using the accrual basis of accounting, except for the cash flow information. The comparative figures presented in these condensed interim consolidated financial statements are in accordance with IFRS and have not been audited.

These condensed interim consolidated financial statements do not include all of the notes required for full annual financial statements.

The significant accounting policies for the periods are consistent with those disclosed in the audited annual financial statements of the Company for the year ended July 31, 2018. The accompanying financial statements should be read in conjunction with the Company audited annual financial statements.

(a) Investment in Associates

An associate is an entity over which the Company has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. Under the equity method, investments in associates are carried in the statement of financial position at cost adjusted for post-acquisition changes in the Company's share of net assets of the associates, less any impairment losses.

The requirements of IAS 39 *Financial Instruments: Recognition and Measurement (IAS 39)* are applied to determine whether it is necessary to recognize any impairment loss with respect to the Company's investment in an associate. When necessary, the entire carrying amount of the investment is tested for impairment in accordance with IAS 36 *Impairment of Assets (IAS 36)* as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment.

Any reversal of that impairment loss is recognized in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

Losses in an associate in excess of the Company's interest in that associate are recognized only to the extent that the Company has incurred a legal or constructive obligation to make payments on behalf of the associate.

(b) Presentation currency and foreign currency translation

The consolidated financial statements are presented in Canadian dollars which is the functional currency of each subsidiary in the Company.

Foreign currency transactions are translated into functional currency of each entity using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from re-measurement of foreign currency denominated monetary items at reporting period and exchange rates are recognized in profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

Non-monetary assets and liabilities that are measured at historical cost are translated using the reporting period ends.

The Company reassesses whether or not it controls a subsidiary if facts and circumstances indicate that there are changes to one or more of the three above mentioned elements.

(c) Significant Accounting Judgments and Estimates

The preparation of the Company's consolidated financial statements in accordance with IFRS requires Company's management to make certain judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. Actual results are likely to differ from these estimates. Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses in these consolidated financial statements are discussed below.

Going concern: The assessment of the Company's ability to continue as a going concern requires significant judgment. The Company considers the factors outlined in Note 1 when making its going concern assessment.

Exploration and evaluation assets: The application of the Company's accounting policy for exploration and evaluation assets requires judgment in determining whether it is likely that such acquisition costs incurred will be recovered through successful exploration and development or sale of the asset under review. Furthermore, the assessment as to whether economically recoverable resources exist is itself an estimation process. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off to profit or loss in the period when the new information becomes available. The carrying value of these assets is detailed at Note 7.

Estimates and assumptions

Share-based payments: The Company utilizes the Black-Scholes Option Pricing Model ("Black-Scholes") to estimate the fair value of stock options granted to directors, officers and employees. The use of Black-Scholes requires management to make various estimates and assumptions that impact the value assigned to the stock options including the forecast future volatility of the stock price, the risk-free interest rate, dividend yield and the expected life of the stock options. Any changes in these assumptions could have a material impact on the share-based payment calculation value.

Valuation of investment in associates: At the end of each financial reporting period, the Company's management estimates the fair value of its investments based on the criteria below and records such valuations in the financial statements directly in net loss:

- There has been a significant new equity financing with arms-length investors at a valuation above or below the current fair value of the investee company, in which case the fair value of the investment is adjusted to the value at which the financing took place; or
- Based on financial information received from the investee company it is apparent to the Company that the investee company is unlikely to be able to continue as a going concern, in which case the fair value of the investment is adjusted downward; or
- There have been significant corporate, operating, technological or economic events affecting the investee company that, in the Company's opinion, have a positive or negative impact on the investee company's prospects and, therefore, its fair value; or
- The investee company is placed into receivership or bankruptcy.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

In addition to the circumstances described above, the Company will take into account general market conditions when determining if an adjustment to the fair value of an investment is warranted at the end of each reporting period. In the absence of the occurrence of any of these events, or any significant change in general market conditions, the fair value of the investment is left unchanged.

Application of the valuation techniques described above may involve uncertainties and determinations based on the Company's judgment, and any value estimated from these techniques may not be realized.

Changes in Accounting Policies—New and Amended Standards and Interpretations

IASB or the IFRIC have issued certain pronouncements that are mandatory for accounting years beginning on or after January 1, 2018. None of these are expected to be relevant to the Company's financial statements, except for the following:

IFRS 9 amends the requirements for classification and measurement of financial assets, impairment, and hedge accounting. IFRS introduces an expected loss model of impairment and retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortized cost, fair value through profit or loss, and fair value through other comprehensive income. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. IFRS 9 will be effective for the fiscal year beginning January 1, 2018. The Company does not expect that the new standard will have a material effect on the Company's financial statements.

4. CASH AND CASH EQUIVALENTS

Cash and cash equivalents on the statement of financial position comprise cash at bank, held in trust, on hand, and short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash.

La Loutre Crystalline and Lac-des-Iles – Quebec

On September 22, 2014 the Company obtained an option with Quebec Precious Metals Corporation (formally Canada Strategic Metals Inc.) (“QPM”), to purchase a 40% interest in the La Loutre Crystalline Flake Graphite Property located in Southern Quebec by paying \$12,500, funding \$500,000 in exploration expenditures and issuing 125,000 shares at a price of \$0.70 per share.

On February 6, 2015 (amended December 30, 2016), the Company signed an agreement with QPM to acquire an additional 40% interest in the La Loutre property, located in Southern Quebec, for an 80% interest in the Lac-Des-Iles property. The Company paid \$10,000 upon signing, issued 300,000 shares at \$0.70 per share, and agreed to fund \$2,750,000 as follows:

- \$1,500,000 on the La Loutre property (paid)
 - \$1,000,000 no later than December 31, 2018, on other mining rights of QPM (paid)
 - \$250,000 on the Lac Des Iles property (paid)
- QPM remains the operator at both properties until the terms are fully met.

Included in the Exploration Expenditures, will be a management fee payable to QPM (the “Operator”) equal to 5% of expenditures incurred.

The La Loutre property is subject to a 1.5% net smelter royalty (“NSR”) of which 0.5% “NSR” can be purchased by the Company for \$500,000.

On May 13, 2016 (amended December 30, 2016 and December 24, 2018) the Company signed an additional option agreement on the La Loutre and Lac des Iles properties, allowing the Company to increase its interest in the property from 80% to 100%. The terms of the acquisition are as follows:

- Issuance of 950,000 common shares - 450,000 have been issued as of July 31, 2018
- Funding exploration expenditures for an additional \$1,125,000 due December 31, 2019

Reserves

Equity reserve records items recognized as share-based payments and allocation of the value of warrants until such time that the stock options and warrants are exercised, at which time the corresponding amount will be transferred to share capital.

The values recorded to reserves for stock options and warrants are transferred to deficit on expiration of such stock options and warrants.

9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company is exposed through its operations to the following financial risks:

- Market Risk
- Credit Risk
- Liquidity Risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, except as noted under equity risk. Its objectives, policies and processes for managing those risks or the methods used to measure them from previous year have not changed.

General Objectives, Policies and Processes:

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's finance function. The Board of Directors receive quarterly reports from the Company's Chief Financial Officer through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

a) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of four types of risk: foreign currency risk, interest rate risk, commodity price risk and equity price risk.

9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT - continued

Foreign Currency Risk:

Foreign currency risk is the risk that a variation in exchange rates between the Canadian dollar and US dollar or other foreign currencies will affect the Company's operations and financial results. The Company does not have significant exposure to foreign exchange rate fluctuation.

Interest Rate Risk:

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company does not have any borrowings. Interest rate risk is limited to potential decreases on the interest rate offered on cash and cash equivalents held with chartered Canadian financial institutions. The Company considers this risk to be low.

Equity Price Risk:

Equity risk is the uncertainty associated with the valuation of assets arising from changes in equity markets. The investment in Graphene 3D Lab Inc. was measured at fair value and is subject to re-measurement.

b) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments which are potentially subject to credit risk for the Company consist primarily of cash and cash equivalents and due from associate. The majority of cash and cash equivalents are maintained with financial institutions of reputable credit and may be redeemed upon demand. The carrying amount of financial assets represents the maximum credit exposure. The Company has gross credit exposure at April 30, 2019 relating to cash of \$304,141, other receivables of \$16,960, and due from associate of \$116,009. All cash, cash equivalents and short term deposits are held at the Bank of Montreal.

c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company ensures that it has sufficient cash on demand to meet short-term business requirements, after taking into account the Company's holdings of cash.

The Company's cash is invested in business accounts and is available on demand. Funding risk is the risk that the Company may not be able to raise equity financing in a timely manner and on terms acceptable to management. There are no assurances that equity financing will be available when, and if, the Company requires additional financing. The Company considers liquidity risk to be high.

The following table summarizes the Company's significant remaining contractual maturities for financial liabilities as at April 30, 2019 and July 31, 2018.

d) Fair value of financial instruments

The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate fair value:

	Level 1	Level 2	Level 3	Total
April 30, 2019				
Cash and Cash equivalents	\$ 151,182	\$ -	\$ -	\$ 151,182
July 31, 2018				
Cash and Cash equivalents	\$ 40,777	\$ -	\$ -	\$ 40,777

Level 1 - quoted prices (unadjusted) in active markets

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs)

10. CAPITAL RISK MANAGEMENT

It is the Company's objective when managing capital to safeguard its ability to continue as a going concern in order that it may continue to explore and develop its mineral properties and investment in power supply products companies and continue its operations for the benefit of its shareholders. The Company's objectives when managing capital are to:

- continue the exploration and development of its mineral properties;
- support any expansion plans; and maintain a capital structure which optimizes the cost of capital at an acceptable risk.

The Company manages its equity (which includes common shares, share-based payment reserve and accumulated deficit) as capital. The Company intends to expend existing working capital by carrying out its planned acquisition, exploration and development activities on mineral properties and continuing to pay administrative costs.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristic of the underlying assets. In order to maintain or adjust the capital structure the Company may issue new shares. In order to facilitate analysis and management of its capital requirements, the Company prepares and updates annual budgets (as needed) to ensure that its acquisition and exploration operations can continue to progress. Budgets, once finalized, are approved by the Board of Directors.

There have not been any changes to the Company's capital management objective, policies and processes compared to the prior year. The Company is not subject to any externally imposed capital requirements.

The Company capital consists of cash, and share capital. The Company's objectives when maintaining capital are to maintain a sufficient capital base in order to meet its short-term obligations and at the same time preserve investors' confidence in the Company's ability required to sustain future

13. COMMITMENTS – continued

Reconfirmation

This Plan must be reconfirmed by a resolution passed by a majority of the voting shareholders at the annual meeting of the Company to be held in 2020 and at every third annual meeting of the Company thereafter. If this Plan is not reconfirmed or is not presented for reconfirmation at any such annual meeting, this Plan and all outstanding Rights shall terminate and be void.

Promissory note

On July 31, 2018, Prometheus Cryptocurrency Mining Ltd.(UK), a public company, was incorporated. On August 1, 2018, the Company purchased 20% of the issued shares with a deemed value of £20,000 (C\$34,142). A promissory note was signed on August 1, 2018 by the Company to enable it to purchase the shares. The note is non-interest bearing and is payable on demand. As the Company and a common director own 62% of the outstanding shares, the investment will be accounted for on the equity basis. As of April 30, 2019, no shares, relating to this transaction have been issued to the Company

Flow through expenditures

The Company is able to continue to incur exploration expenses beyond the deadlines. However it could be subject to a penalty of 4-5% per annum on the balance required to be spent on its exploration work. The Company intends to fulfill its flow-through commitments within the given time constraints. During the year the Company recorded \$745 (2018-\$Nil) in Part XII.6 interest.

14. CONTINGENCIES

As a result of a cease trade order issued on November 26, 2018 (“CTO”) by the B.C. Securities Commission (the “Commission”) against certain consultants, the Company is reviewing private placements completed during the year ended July 31, 2018. The CTO cites improper use of the “consultant’s exemption” contained in section 2.24 of National Instrument 45-106 and the payment of consulting fees to the parties named in the CTO. The Company is not named in the CTO. However, the private placements involved four parties named in the CTO. Following completion of the private placements, the Company paid consulting fees to these four parties. Upon a review of the services provided by those parties, as described by management, the Company is satisfied with the consulting services performed, that the parties were properly designated as consultants for the purposes of the “consultant’s exemption” and that the exemption was properly used. However, there is a risk that the Commission, in its review, may view the private placements to the four parties as an improper use of section 2.24 as an illegal distribution of shares. If such is adjudicated to be the case, the Company may be required to take remedial action. Such action, if required, cannot at this time be determined.
